MISSION STATEMENT

Altron's mission is to:

Create value for shareholders as a combined leading JSE listed company serving the converging Information Technology, Telecommunications and Multi-Media, as well as the Power Electronics sectors. We will manage a business portfolio, creating leading market share positions so as to enhance and sustain relative competitive performance in the sub-Saharan region and selected international markets. Our growth targets, aimed at outperforming our peers, will be achieved through a combination of organic and acquisition-related investment. We aim to maintain our family-controlled ownership structure and to preserve and nurture our culture of "familiness", while embracing black economic empowerment, thereby securing superior human capital. We remain dedicated to technology innovation through both internal investment in our own IP and strategic alliances with leading multinationals, allowing us to build businesses with a focus on an increasing element of annuity income and services-based revenue streams.
